-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 3 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Chung et al (US 6,250,364).

As to claim 3, Chung et al disclose a method of forming a molded article on an injection machine using metal matrix composite material, wherein the molding apparatus includes a molding die and a die cavity therein, an injection cylinder, and piston formed inside the cylinder (figure 3). Chung et al disclose the method comprising, supplying a desired amount of metallic material in semi-solid state and a desired quantity of metal matrix composite in molten state into the injection machine, such that the metallic material is situated on a piston side adjacent to the

piston and the molten metal matrix composite material is situated on a gate side adjacent to the gate (figure 8) (col. 6, lines 17-23). The piston is then advanced toward the gate to force the metal and metal matrix composite into the die cavity to form in the die cavity (figures 3, 4, 5).

As to claim 4, Chung et al disclose wherein the two adjoining parts, one part having a higher mechanical strength than the other part, wherein the desired quantity of metal matrix composite material is substantially equal to a cubic volume of the one part of the molded article, and the desired quantity of the metallic material is substantially equal to the sum of a cubic volume of the other part of the molded article and a cubic capacity of the gate (figure 5).
